

Premium-Quality Drinking Water

Combined with a water conditioner system, a home Reverse Osmosis (RO) or filtration system will provide your family with purer, better tasting drinking water. You will no longer need to buy expensive bottled water at the store or have it delivered to your home. Pure, fresh water will be available right at your kitchen tap. Ask your professional water treatment dealer about quality Reverse Osmosis or filtration systems utilizing Osmonics components.

Quality You Can Feel
a difference YOU CAN TASTE | *enhanced quality water systems*

INTRODUCING *a simple treatment for Better Water*

Quality water systems are designed to provide your home with better tasting, purer drinking water, while also removing the various undesirable elements that may be present in hard water, including iron, calcium, sediment and rust. Quality water systems consist of two primary components. These components are the water conditioning system and the drinking water filtration system. These two systems in your home will not only improve your water, they will also improve your way of life!

How an Osmonics Quality Water System Will Benefit Your Family:

In the Kitchen

- Purer, better tasting filtered drinking water at your tap eliminates the need for expensive bottled water from the store or delivered to your home
- Purified water improves the taste of juice, coffee and soup
- Ice cubes will be clearer and harder
- Dishes and china will sparkle, using less dish soap
- Clean coffee maker with no scale or build-up
- Save work scrubbing the kitchen sink, cutting boards and counter tops

In the Bathroom

- Soap will make great lather
- Conditioned water leaves your skin feeling smoother after showering, shaving and washing
- Hair will be softer and more manageable
- Reduces soap scum and residue buildup on showers, tubs and sinks
- Saves you time and money by reducing scrubbing time in the bathroom and reducing soap, shampoo and bathroom cleaner usage by nearly 50%*

Plumbing and Appliances

- Increases water heater efficiency by almost 30%*, and extends the water heater life by many years
- Improves water flow and pressure by eliminating calcium buildup in pipes
- Reduce mineral stains and odors on clothing and on plumbing fixtures
- Clothes and linens are cleaner, brighter, softer and last longer
- Adds life to dishwashers and washing machines
- Cut down on laundry detergent and fabric softener use by 50%*, saving you money

Osmonics is committed to providing home owners with the best quality water conditioner and filtration products available today. Working with your professional water treatment dealer, you will be able to select a system that will fit your exact water treatment needs and budget. With an Osmonics water treatment system in your home, you will be assured of many years of quality conditioned water.

The Autotrol® ReadySoft™ System

The Autotrol ReadySoft duplex conditioner system is the market leader in reliable continuous-supply water conditioning control systems. Its lightweight Noryl* plastic construction ensures you many years of operation. The 255 valve features DuraFlow™ valve-disc operation, which seat in a vertical position and will not etch. This valve type will not leak, because the valve seal is held closed by water pressure.

*Noryl is a trademark of General Electric Company.

The ReadySoft Controller

The most sophisticated control on the market, the ReadySoft control gives your water treatment dealer the ability to set 19 parameters allowing for the control to match your exact water needs. This environment-friendly control ensures you continuous soft water; and saves you money, water and regenerant. Other great features include:

- Twin-tank system; one tank is providing soft water while the other is regenerating.
- Demand-initiated regeneration; a control meter measures your water usage ensuring the maximum capacity and efficiency for your system.
- Advanced microprocessor system that actually learns your family's water usage, and adapts the control to your water needs! The control even shows you how many gallons of conditioned water are left before the next regeneration!
- Battery back-up and NOVRAM memory will retain all settings in the event of a power failure.
- Low-voltage power source is safe to use in your home.
- Calendar override automatically regenerates the system at a time interval you select if usage hasn't initiated a regeneration.
- Solid-state electronics guarantee many years of usage.
